

Performance Report

ID: 69a68a7c43c5add9fcf88ead

Date: 3/3/2026, 12:45:08 PM

Duration: 14s

Q1: Introduce yourself.

Ans: Hello, this is Avinandan Yadav.

Feedback: While your introduction was friendly and to the point, as a technical interview, we expect more substance from a candidate. Technical interviews focus on a candidate's skills and problem-solving abilities. Please focus on highlighting your technical expertise and experiences throughout the conversation.

Q2: Can you explain the difference between var, let, and const in JavaScript?

Ans: So, in JavaScript var is introduced way before than let and const. Let and const are the latest features introduced in year 6 module.

Feedback: The candidate answered correctly that let and const were introduced in ES6. However, they provided an incorrect year and scope information. To improve, the candidate should research and clearly define the differences in scope and usage between var, let, and const. They should also be precise when providing dates, ensuring that they are accurate and relevant to the technical discussion.
